

## Recording a Video or Audio File within Discussions tool using Kaltura Express Capture

This tutorial provides step-by-step instructions for recording a video or audio file within the Discussion tool in D2L using Kaltura Express Capture. **Kaltura Capture Express** recordings are saved in your **My Media** space in D2L.

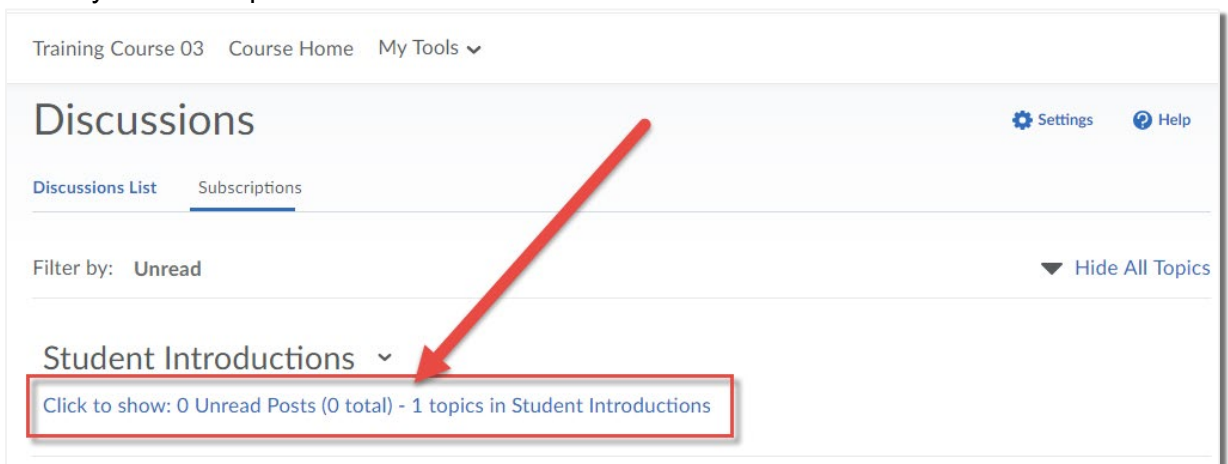

For further information or assistance, please visit our [Team Dynamix Support portal](#) and select the appropriate Category to submit a ticket.

### Steps

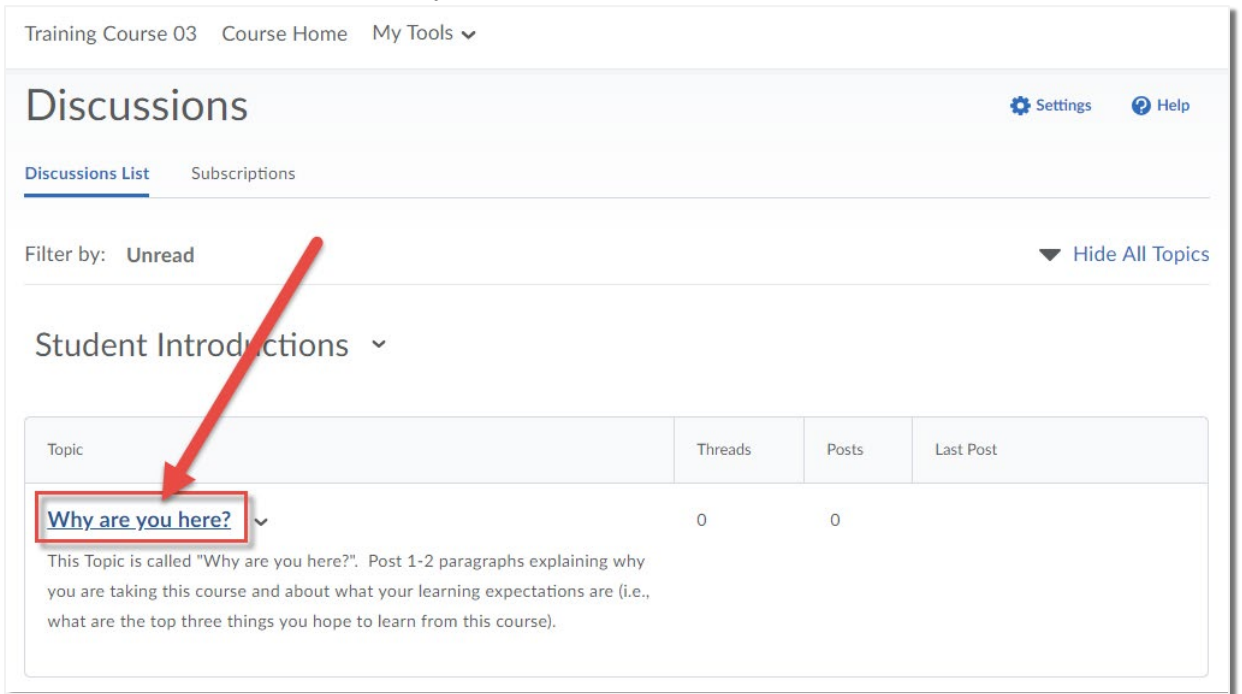

1. Navigate to your course in D2L.
2. Select **Discussions** from the course navigation bar.  
**Note:** You may need to access the Discussions Tool through **My Tools** drop-down menu.

3. Click on the “**Click to show...**” link to see the list of Discussion Topics in the Forum where you want to post a video or audio file.

4. Click the **title** of the Topic where you want to post a video or audio file.

This Topic is called "Why are you here?". Post 1-2 paragraphs explaining why you are taking this course and about what your learning expectations are (i.e., what are the top three things you hope to learn from this course).

**Start a New Thread**

Filter by: All Threads ▾ Sort by: Most Recent Activity ▾

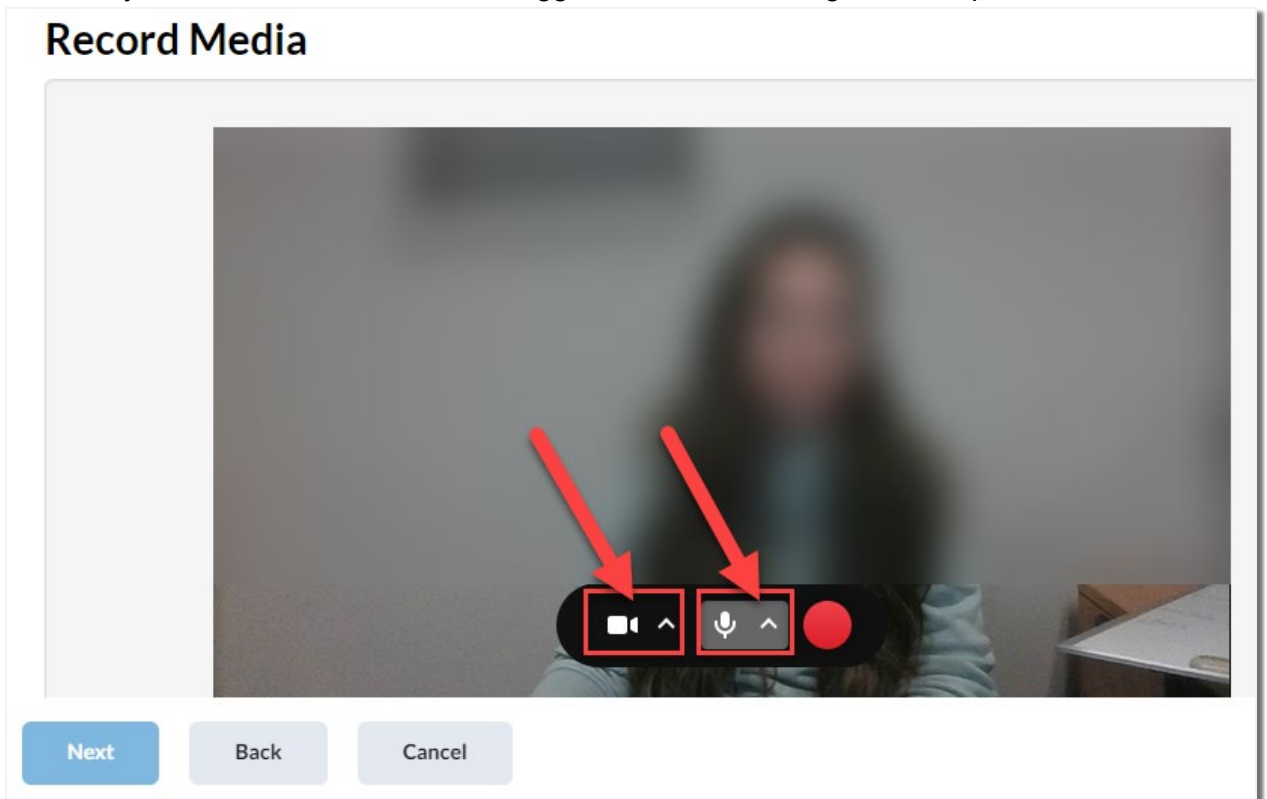

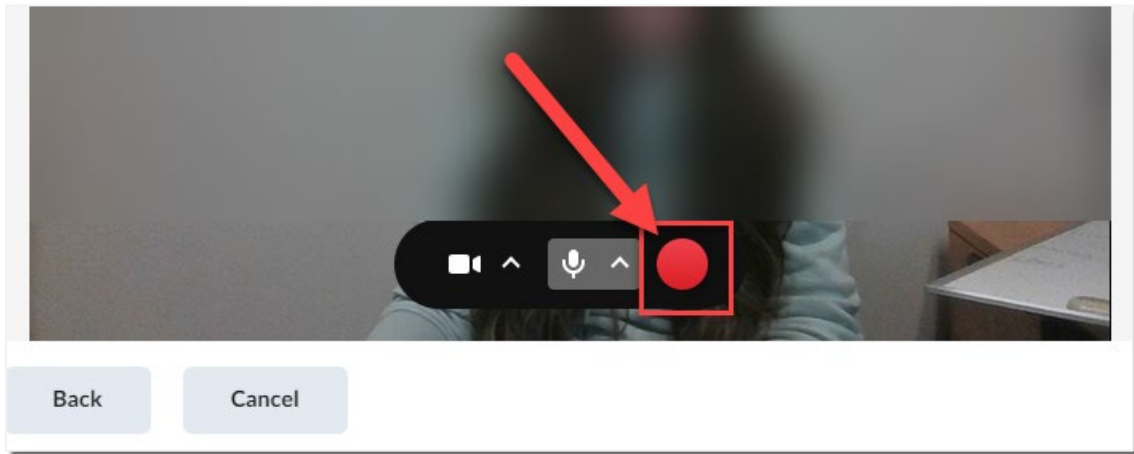

9. Click the **+ Add New** button, and then select **Express Capture**.

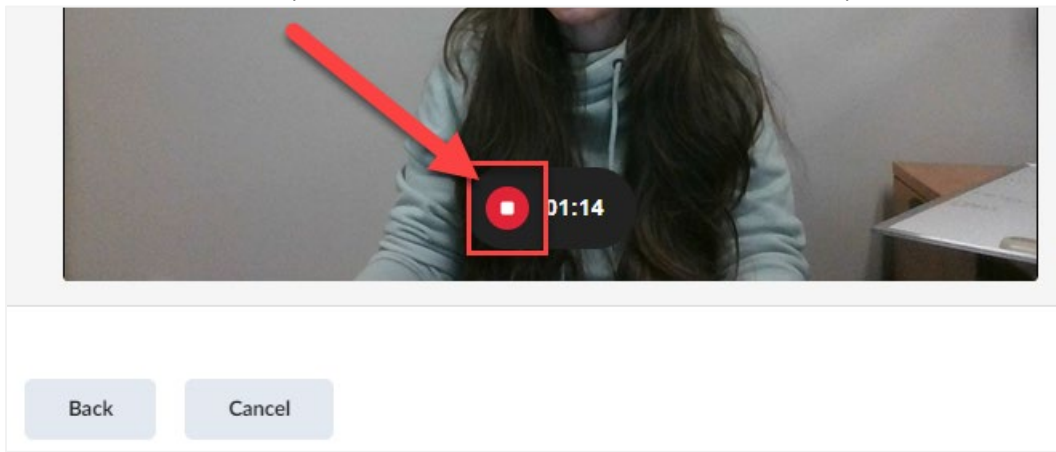

10. In the Record Media window, your webcam video will appear with a record button (red circle) at the bottom centre. Click the **video** and **microphone** icons beside the record button to change your camera and/or microphone settings. For example, to record an audio-only file, click the video icon and toggle the camera setting to the off position.

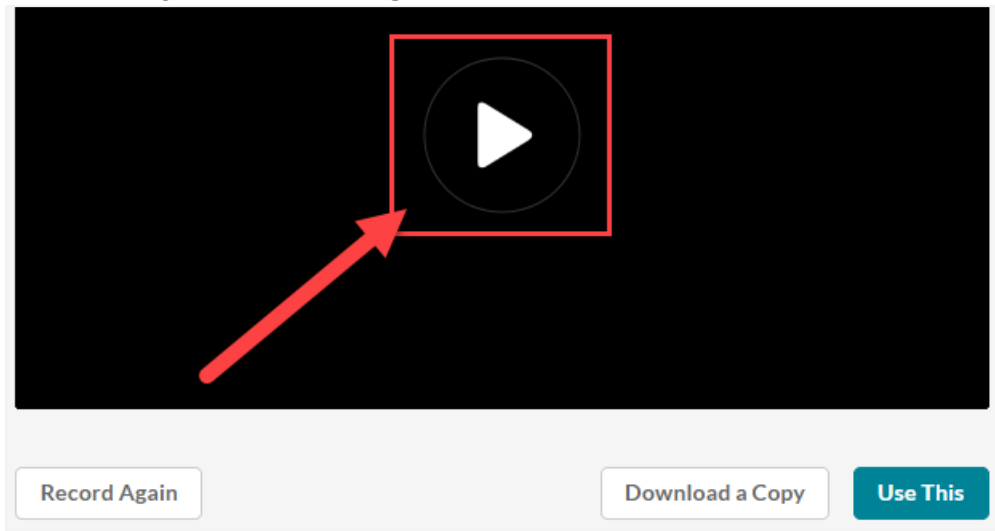

11. Click the record button (red circle) to begin recording.

12. Click the **Stop** button (red circle with a white square in the centre) to stop recording.

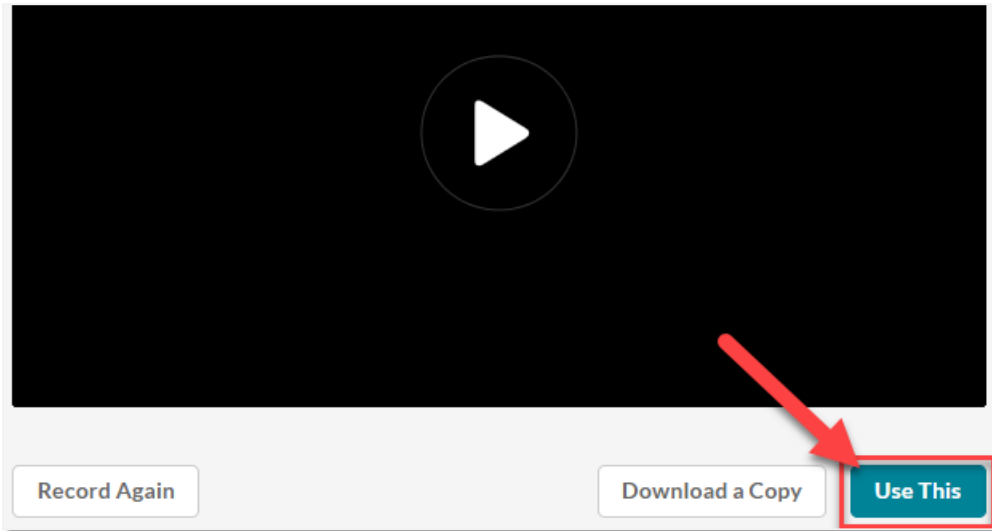

13. Click the **Play** icon (white triangle) to preview your recording. If you do not want to keep the recording, click **Record Again** to delete and re-record.

14. Once you have a recording you want to keep, click **Use This** to save the recording to **My Media** and insert it into your discussion post.

15. Once the progress bar displays, “Upload Complete!”, click **</> Save and Embed**.

16. Click **Insert**.

17. Click **Post** to submit your discussion post (including your audio or video file).

## Things to Remember

- Recordings made with Kaltura Express Capture are saved in My Media. We recommend deleting recordings from My Media when they are no longer needed.
