

Adding Kaltura Media from one D2L Course Media Gallery to Another D2L Course– Kaltura Tutorial

This tutorial is designed for faculty who have previous experience using D2L, who have uploaded media to **My Media** in D2L and shared to a **Course Media** gallery in a Master or DEV course site. For further information, please contact <u>elearning@camosun.ca</u> for assistance.

Scenarios

This tutorial will cover the steps involved when you wish to copy Kaltura media from one D2L course's **Course Media** gallery to another D2L course, either to its **Course Media** gallery, or to an HTML editor, for example in Content.

Note that if you **Copy All Components** from a DEV or Master to another D2L course, everything will copy except for the **Course Media** gallery, because it is specific to *an individual* D2L course site. Therefore, you will need to add the **Course Media** link on your course navbar, and either share media to it from your **My Media** (which remains intact no matter which course you are working in), or follow the steps in this tutorial to Import media from one **Course Media** gallery to another.

Steps to Import Entire Course Media Gallery

- 1. Go to the course in D2L you wish to share media TO.
- 2. Click Course Media.

3. Click the Channel Actions menu (top right) and select Import.

4. Select the course with the Course Media gallery you want to copy from, and click Import. Note that you can NOT select individual videos to import – you can only import the entire Course Media gallery, then delete the videos you don't want!

Select the mee impor	dia gallery you want to t entries from
 D2L Training Course - 4 D2L On-Econand Training 	
Cancel	Import

5. Wait until Importing has completed, then refresh the page.

6. Click the Media tab to see the videos you have imported.

Steps to Embed a Video, or a Playlist, from another Course Media Gallery into the HTML Editor (for example, in Content)

- 1. Go to the course in D2L you wish to share media TO.
- 2. Now, go to the **Content** tool in your course and click on the title of the Module you want to add your video to. Click **New** and select **Create a File**.

Search Topics Q	Kaltura Videos ~	🔒 Print	🔅 Settings
토 Overview	Add dates and restrictions		Draft 🗸

Table of Contents	Urload Files Drag and drop files here to create and update topics		
H Kaltura Videos Draft	Create a File		
Sample Module	Create a Link		
	Add from Manage Files		
Sample Rubrics	New Checklist		

3. Give your Topic a Title. Then click in the HTML editor box and add some text to provide a context for the video you will be embedding. For example, explain to your students what the video is about and what they should be watching/listening for. Make sure to hit your Enter key so your cursor appears below the text you just typed in, otherwise your video may not appear where you want it to! Click on the Insert Stuff icon at the top left of the HTML editor.

Things to Remember

The second process of embedding videos from Course Media galleries will work anywhere the HTML editor exists in D2L (for example, News, Discussions, etc.).
