Adding a Kaltura Video Quiz to Content (using the HTML Editor) in D2L – Kaltura Tutorial

This tutorial is designed for faculty who have previous experience using D2L, and who have created a Video Quiz through **My Media** in D2L. For further information, please contact <u>elearning@camosun.ca</u> for assistance.

## Scenario

This tutorial will cover the steps involved when you wish to embed an Interactive Video Quiz into the HTML Editor in D2L (for example, into a page in the Content tool). Adding a Video Quiz to the HTML editor allows you to create context around it, however when a Video Quiz is embedded in the HTML editor, the results can NOT be sent to the Grades. See the tutorial *Connecting a Video Quiz to a Grade Item* for more information.

For the purposes of this tutorial, we will be embedding a Video Quiz into a Topic page in the Content tool.

## Steps

- 1. Go to your course in D2L.
- 2. Go to Content.
- 3. Click the title of the Module to which you want to add a video quiz. Click **New** and select **Create a File**.

10. Your Video Quiz can now be viewed and completed by your students. Remember that when embedding a Video Quiz this way does not allow you to send grades to the Grades tool. This would be more for a self-study situation.

# Things to Remember

To connect a video quiz to a Grade Item, you will need to add it as a direct link in a Content Module. See the tutorial *Connecting a Video Quiz to a Grade Item in D2L* for more information.
