

## Adding a Kaltura Video to a Discussion in D2L – A Student Kaltura Tutorial

**Kaltura** is the streaming media tool integrated into D2L and supported by eLearning at Camosun. Kaltura gives faculty and students a place to upload, create, and edit their course-related videos, audio files, and images. For further information or assistance, go to our [Team Dynamix Support portal](#) and click the appropriate Category to submit a ticket.

### Scenario

This tutorial will cover the steps involved when you wish to embed a video (*that you have already uploaded into your **My Media** space*) into the Discussions tool in D2L.

### Steps

1. Go to your D2L course, and then to the **Discussions** tool.
2. Click on the title of the **Discussion Topic** you want to add your video to.

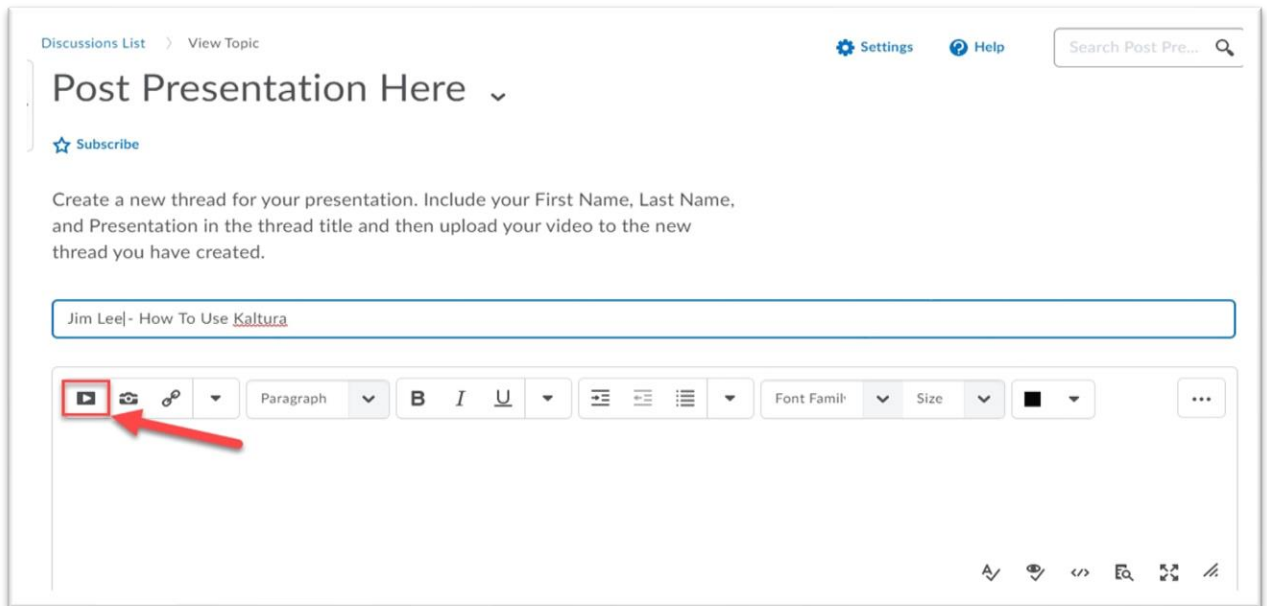

The screenshot shows the D2L Discussions List interface. At the top, there are navigation tabs: [Discussions List](#), [Subscriptions](#), [Group and Section Restrictions](#), and [Statistics](#). Below the tabs are buttons for [New](#) and [More Actions](#). A filter section shows [Filter by: Unread Unapproved](#) and a [Collapse All Forums](#) button. The **Multimedia Presentations** forum is expanded, with the instruction: "Use this forum to share your presentations with others in the class." Below this is a table with the following structure:

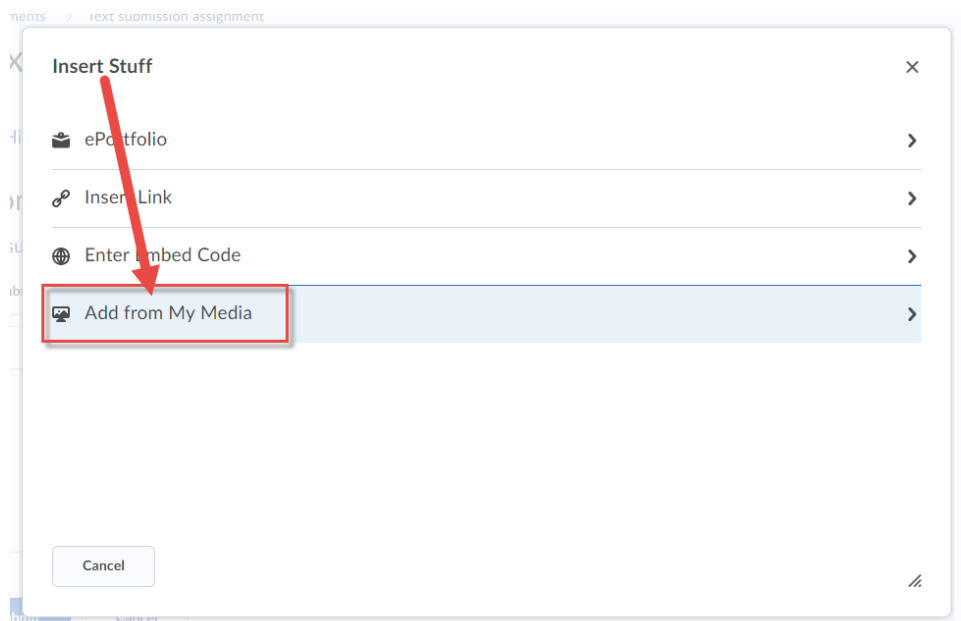

Topic	Threads	Posts	Last Post
<a href="#">Post Presentation Here</a> Create a new thread for your presentation. Include your First Name, Last Name, and Presentation in the thread title and then upload your video to the new thread you have created.	0	0	

A red arrow points to the [Post Presentation Here](#) link in the table.

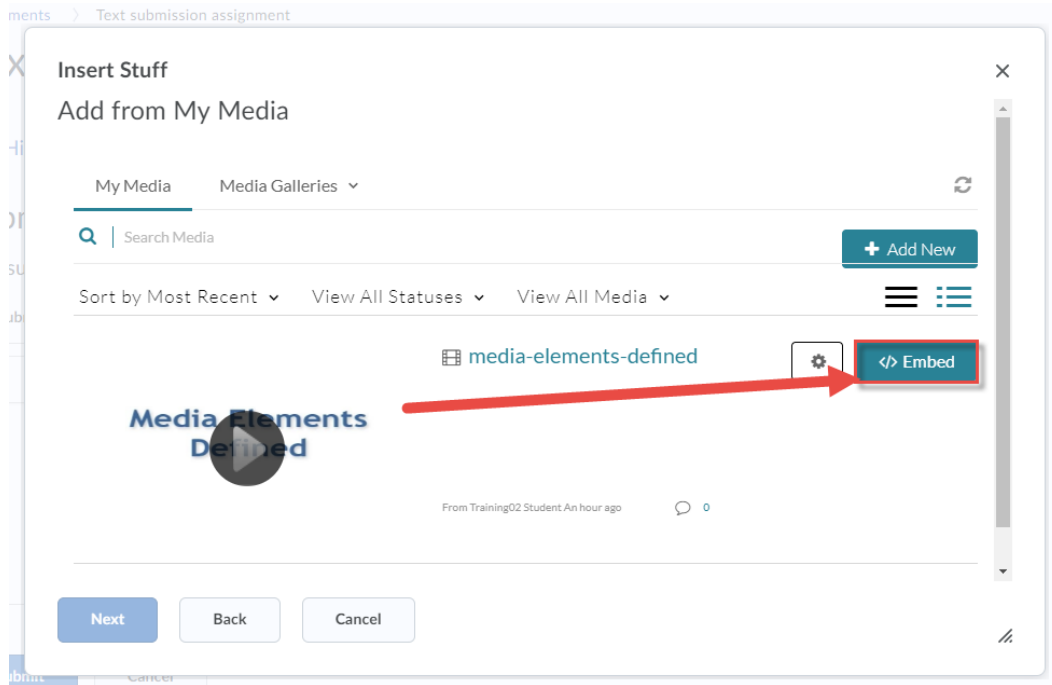

3. Click **Start a New Thread** (or reply to an existing thread), add a **Subject**, then click the **Insert Stuff** icon (at the top, left on the toolbar.)

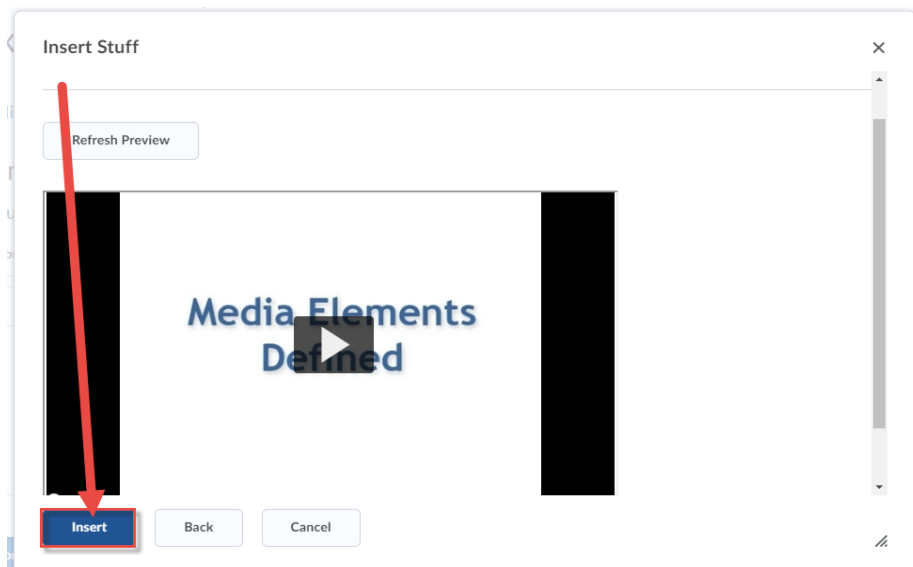

4. In the **Insert Stuff** box that opens, click **Add from My Media**.

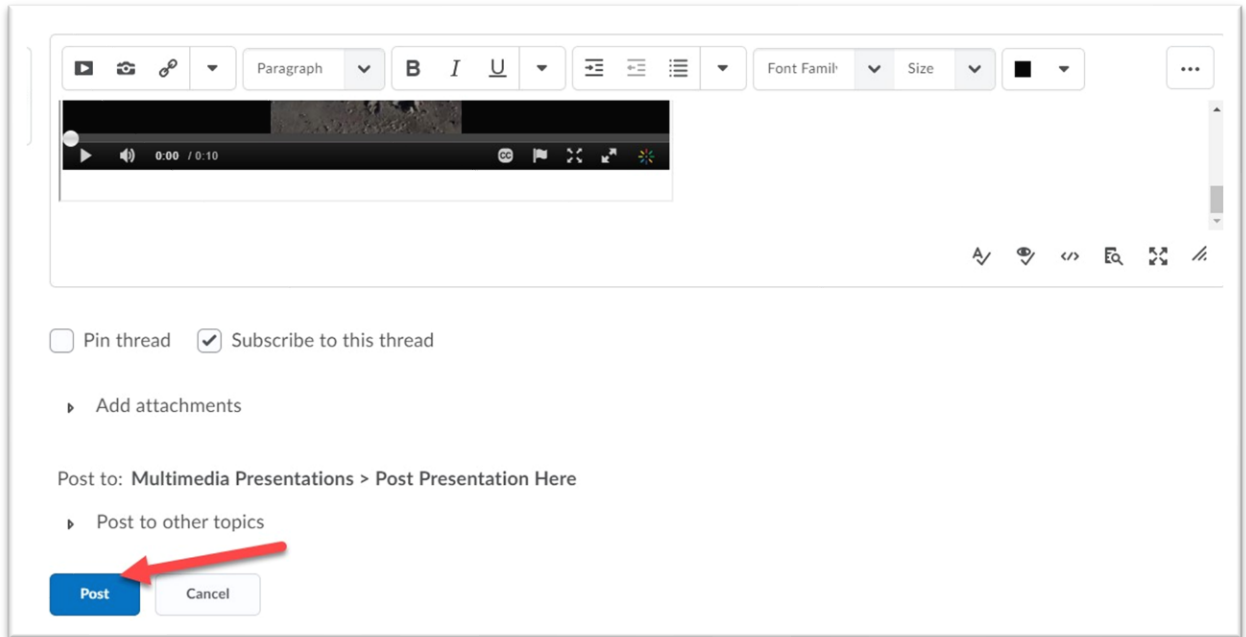

5. Scroll down to find your video assignment, and click the **Embed** button.

6. Make sure the video appearing in the **Preview** window is the right one, then click **Insert**.

7. Click **Post**.

## Things to Remember

You need to have added videos to your **My Media** space first in order to embed them into a Discussion post.

You can also add Kaltura videos into **Assignments** in the same way (using **Insert Stuff**). See the tutorial *Adding a Kaltura Video to an Assignment* for more information.
