

Creating an Additional Submission View for a Quiz – D2L Tutorial

This tutorial is designed for faculty who have previous experience using the Quizzes tool in D2L. For further information or assistance, go to our [Team Dynamix Support portal](#) and click the appropriate Category to submit a ticket.

Scenario

This tutorial will cover the steps involved when you want to release correct and/or incorrect responses, and/or question answers to students after the quiz has closed.

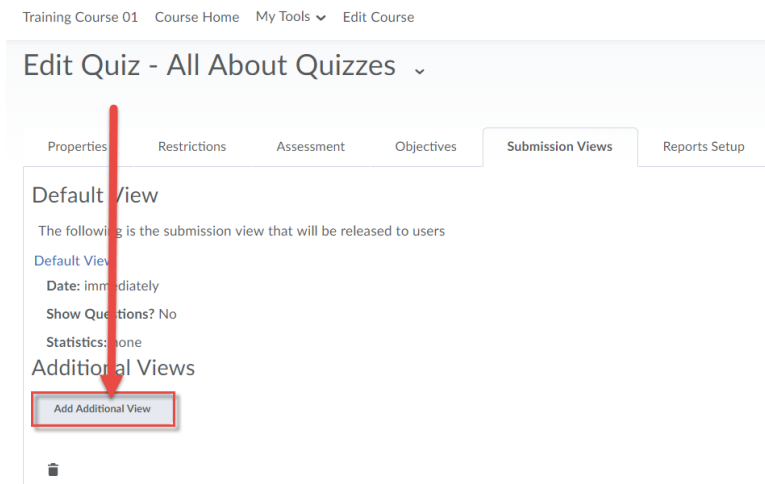

Steps

1. Go to the **Quizzes** tool in your course.
2. Edit the Quiz you wish to release results for.
3. Click on the **Submissions Views** tab.

The screenshot shows the 'Edit Quiz' interface for a quiz titled 'All About Quizzes'. The breadcrumb trail at the top reads 'Training Course 01 > Course Home > My Tools > Edit Course'. The main heading is 'Edit Quiz - All About Quizzes'. Below the heading are several tabs: 'Properties', 'Restrictions', 'Assessment', 'Objectives', 'Submission Views', and 'Reports Setup'. The 'Submission Views' tab is highlighted with a red box, and a red arrow points to it from the 'Objectives' tab. The 'Properties' tab is active, showing the 'General' section with a 'Name' field containing 'All About Quizzes' and a 'Category' dropdown menu set to 'All assignments'. Below this is the 'Quiz Questions' section with options for 'Questions per page', 'Paging', and 'Shuffle questions at the quiz level'. At the bottom, there are buttons for 'Save and Close', 'Save', and 'Cancel'.

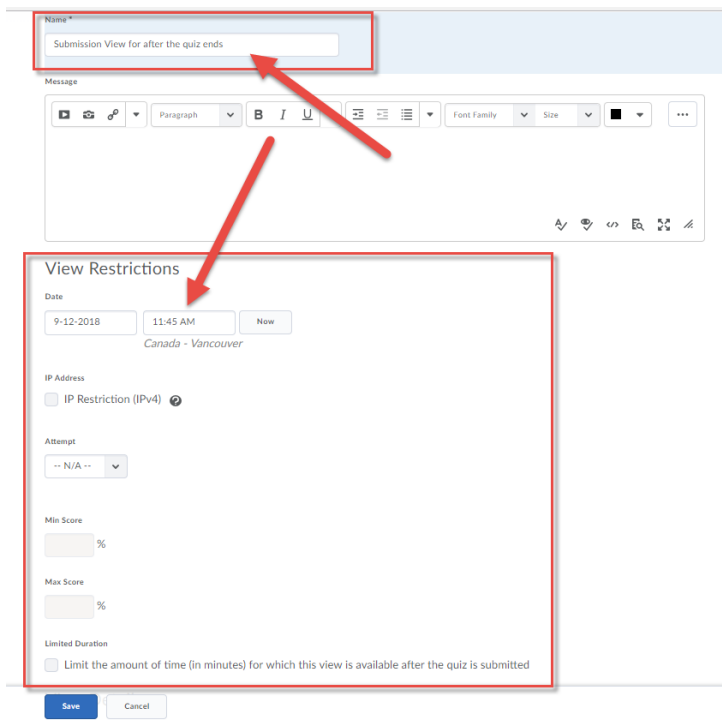

4. Click **Add Additional View**.

5. Give your Additional View a **Name**, then select your **View Restrictions**, setting the date and time you would like students to see these results (for example, set them to be released immediately after the date/time that the Quiz closes.) You can also restrict the viewing to an IP Address (for example, if you only want students to view results in a lab).

Note that the **Limit the amount of time (in minutes) for which this view is available after the quiz is submitted** will work **ONLY immediately** after a student submits their quiz. If you want to limit how long a student can view results in general, you will need to manually delete the **Additional Submission view** when you want to disable it.

6. Scroll down to select the information you wish students to see under **View Details**. For example, for this scenario, we are selecting **Show Questions** → **Show all questions answered incorrectly**. You can also allow students to see all question answers. When finished, click **Save**. Then **Save and Close** to save the Quiz. Students will now be able to see the information you selected when they click on their attempt link.

View Details

Show Questions?

Yes

Show questions answered incorrectly ?

Show questions answered correctly ?

Show all questions without user responses ?

Show all questions with user responses ?

Show question answers ?

Show question score and out of score

No ?

Things to Remember

You can also edit the **Default submissions view** if you would like students to see correct/incorrect responses immediately upon completing the quiz.

You can Preview a Quiz to see the different Submission View options you have created for your quiz to make sure they are showing students what you want.
