

Creating an Additional Submission View for a Specific Quiz Attempt – D2L Tutorial

This tutorial is designed for faculty who have previous experience using the Quizzes tool in D2L. For further information or assistance, go to our [Team Dynamix Support portal](#) and click the appropriate Category to submit a ticket.

Scenario

This tutorial will cover the steps involved when you want to release correct and/or incorrect responses, and/or question answers to students after they have submitted their second (or any other then their first) Attempt at a quiz.

Steps

1. Go to the **Quizzes** tool in your course.
2. Edit the Quiz you wish to release results for. Make sure your Quiz is set to more than 1 Attempt!
3. Click on the **Submissions Views** tab.

Save and Close Save Cancel

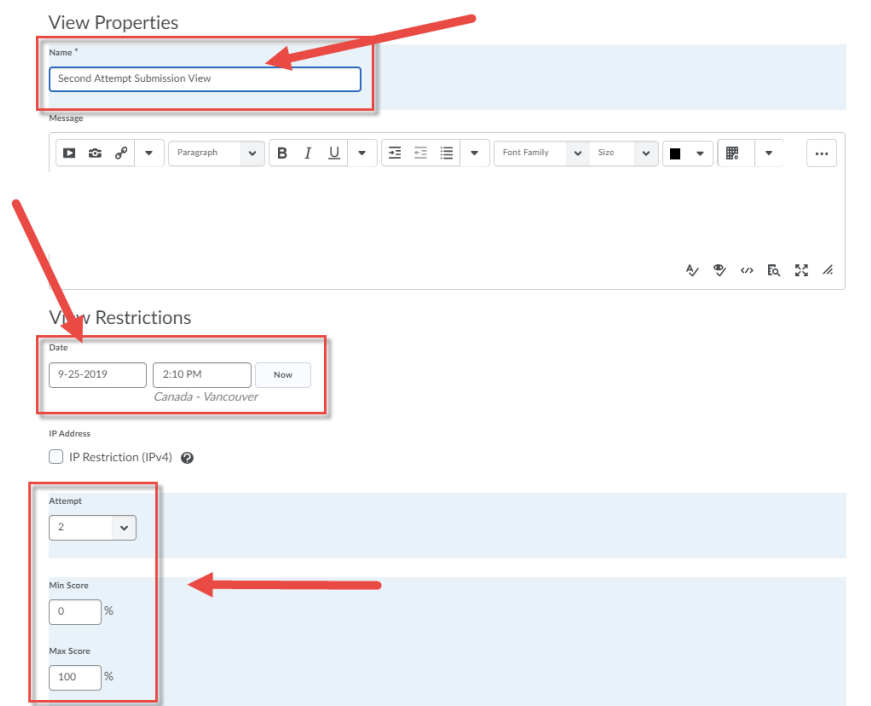

4. Click **Add Additional View**.

5. Give your Additional View a **Name**, then select your **View Restrictions**, setting the date and time you would like students to see these results (for example, set them to be released immediately after the date/time that the Quiz closes.) Click the Attempt drop-down menu, and select the attempt you wish to restrict this submission view to – for the purposes of this tutorial, we will select Attempt 2.

In addition, you must set the Min Score and the Max Score parameters. For this scenario, we want students to see this submission view for all of their second attempts, so we will set the **Min Score** to “0” and the **Max Score** to “100”.

6. Scroll down to select the information you wish students to see under **View Details**. For example, for this scenario, we are selecting **Show Questions** → **Show all questions answered incorrectly**. You can also allow students to see all question answers. When finished, click **Save**. Then **Save and Close** to save the Quiz. Students will now be able to see the information you selected when they click on the relevant Attempt's link.

Things to Remember

You can also edit the **Default submissions view** if you would like students to see correct/incorrect responses immediately upon completing all attempts at the quiz.

You can Preview a Quiz to see the different Submission View options you have created for your quiz to make sure they are showing students what you want.
