## Connecting a Kaltura Video Quiz to a Grade Item in D2L – Kaltura Tutorial

This tutorial is designed for faculty who have previous experience using D2L, and who have created a Video Quiz through **My Media** in D2L. For further information or assistance, go to our <u>Team Dynamix</u> <u>Support portal</u> and click the appropriate Category to submit a ticket.

## Scenario

This tutorial will cover the steps involved when you wish to connect the mark from a Video Quiz to a Grade Item in your course's gradebook.

## Steps

- 1. Go to your course in D2L.
- 2. Go to Content.
- 3. Use the Tutorial Adding a Video Quiz to Content in D2L to embed your quiz in a Content Page. We won't be using this page for the assessment piece, but in order for the Video Quiz to appear as an External Learning Tool, it has to first be embedded in a Content page first! You can keep this page hidden.
- 4. Now, click the title of the Module to which you want to add a video quiz. Click Add Existing Activities and select External Learning Tools.

9. As students complete the Video Quiz, their grades will appear in the Grade Item in the Enter Grades area. Only Multiple Choice and True False questions will be graded. If you want to see results for an Open-Ended Question, you will need to look at the Analytics for the Video Quiz. See the tutorial Video Quiz Analytics in Kaltura for more information.

## Things to Remember

If you are using the Video Quiz for self-assessment only, embed it into an HTML page instead. See the tutorial *Adding a Kaltura Video Quiz to Content in D2L* for more information.
