

## Creating True or False Questions in D2L – D2L Tutorial

This tutorial is for faculty who have previous experience using the Quizzes tool and Question Library in D2L. For further information or assistance, go to our [Team Dynamix Support portal](#) and click the appropriate Category to submit a ticket.

### Scenario

This tutorial will describe how to create a **True or False** question for use in the Quizzes tool in D2L.

### Steps

1. Go to the **Quizzes** tool in your course, then click **Question Library**.

4. Type your question into the **Question Text** box. You will see a **Preview** of the question begin to appear in the right-hand panel.

The screenshot shows a question editor interface. At the top left, there is a link "Back to Question Library". Below it, a dropdown menu is set to "True or False" with an "Options" dropdown to its right. The "Question Text" field contains the text "COVID-19 was discovered in the year 2020." A red box highlights this field, and a red arrow points from it to a preview panel on the right. The preview panel shows the same text and two radio button options: "True" and "False". Below the question text, there is an "Answers" section with two radio buttons: "True" and "False". Below that is a "Default Points" field containing the number "1". At the bottom, there are "Save" and "Cancel" buttons.

5. Click the circle next to the correct answer and adjust the **Default Points** as needed.

This screenshot shows the same question editor interface as the previous one, but with the "False" answer selected. The "Answers" section shows the "False" radio button with a checkmark inside its circle, and it is highlighted with a red box. A red arrow points from this box to the "Default Points" field, which still contains the number "1". The "Question Text" field and the preview panel remain the same as in the previous screenshot.

6. For additional settings, click **Options**. Here you will be able to add **Feedback**, a Hint, a **Short Description**, and **Enumeration**. Click **Save** when you have completed creating your question.

The screenshot shows a question editor interface. At the top left, there is a link "Back to Question Library". Below it, a dropdown menu is set to "True or False". The "Question Text" field contains "COVID-19 was discovered in the year 2020.". Under "Answers", the "False" option is selected. The "Default Points" field is set to "1". At the bottom, there are "Save" and "Cancel" buttons. A red box highlights the "Options" dropdown menu, which is open and shows four options: "Add Feedback", "Add Hint", "Add Short Description", and "Add Enumeration". Red arrows point from the "Options" button to the menu and from the "Save" button to the "Add Feedback" option.

## Things to Remember

If you do add **Feedback** and **Hints** to your True or False question, you can still control whether or not students see those in an individual Quiz using the quiz settings.
