

Using Kaltura Playlists in D2L – Kaltura Tutorial

This tutorial is designed for faculty who have previous experience using D2L, who have uploaded media to **My Media** in D2L, and who have added media and playlists to their **Course Media** gallery. For further information or assistance, go to our [Team Dynamix Support portal](#) and click the appropriate Category to submit a ticket.

Scenario

This tutorial will cover the steps involved when you wish to embed a playlist you have created in the **Course Media** gallery into the HTML editor in your D2L course. For the purposes of this tutorial, we will be embedding a Kaltura playlist into a Content Topic page.

Steps

1. Go to your course in D2L.
2. Click **Course Media**.

The screenshot shows the D2L interface for 'Training Course 03'. The navigation bar includes 'Training Course 03', 'Course Home', 'My Tools', 'My Media', 'Course Media' (highlighted with a red box and arrow), and 'Edit Course'. Below the navigation bar is a banner image of a bear's face with the text 'Training Course 03'. To the left is a 'News' widget with a 'Welcome to D2L Daylight!' announcement. To the right is a 'Territorial Acknowledgement' section with a photo of purple flowers and text about Camosun College's location on traditional territories.

3. Click the Channel Actions menu at the top right and select **Edit**.

4. Click **Playlists**.

- In the **Actions** column, click the **Embed** icon (</>) for the playlist you want to embed into the HTML editor. We will be making a copy of the embed code, so we can paste it into the HTML editor in the Content tool.

- In the **Share & Embed** box, if needed, select the playlist view you prefer, **Vertical** or **Horizontal**, and the **Max Embed Size**. We recommend keeping **Auto Play Off**.

Click **Copy Embed**, then click **Done**. You can paste the code into a WORD document or a text editor if you like, or open another tab and get ready to copy it into the HTML editor (as per the steps below) before copying it.

- Go to the **Content** tool, and click on the title of the Module you want to add your playlist to.
- Click **New** and select **Create a File**.

- Give your Topic a **Title**. Then click in the **HTML** editor box and add some text to provide a context for the playlist you will be embedding. For example, explain to your students what the playlist contains and how they should be using it. **Make sure to hit your Enter key so your cursor appears below the text you just typed in**, otherwise your playlist may not appear where you want it to! Click on the **Insert Stuff** icon at the top left of the HTML editor.

10. In the **Insert Stuff** pop-up, click **Enter Embed Code**.

11. Copy the code from the Course Gallery into the **Embed Code** box and click **Next**.

Things to Remember

If you decide you don't like the playlist view (horizontal or vertical) you have chosen, you will have to go back to Step 6 to change the view and re-copy the code, and then go back to your page, delete the previously embedded playlist, and paste the *new* code into **Insert Stuff**.
