Introduction to Kaltura Express Capture in D2L – Kaltura Tutorial

This tutorial is designed for faculty who have previous experience using **Kaltura** in D2L, as well as the **Assignments** tool. For further information or assistance, go to our Team Dynamix Support portal and click the appropriate Category to submit a ticket.

This tutorial will cover the steps involved when you wish to create a simple video right within D2L. **Kaltura Express Capture** allows you to created videos using your webcam and audio within various assessment tools in D2L (such as Assignments) as well as in your **My Media** area. **Kaltura Capture Express** recordings are saved in your **My Media** space in D2L.

Scenario 1: Adding a Kaltura Capture Express recording to My Media

1. Go to your course in D2L.
2. Go to **My Media**.

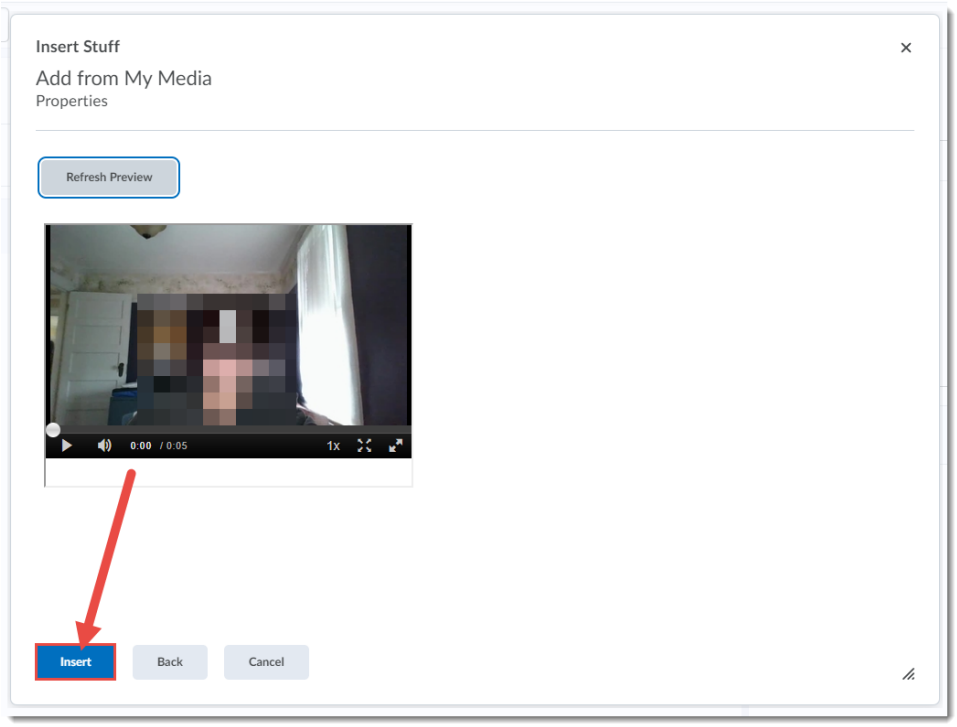
10. Click **Insert**.



11. **Publish** or save your feedback as **Draft** and continue to the next submission.

Things to Remember

You can add a Kaltura Express Capture video into the HTML editor wherever it appears in D2L. For example, you could add a quick video into a News post or a Discussion post. But we recommend if you are creating videos you want to use for more than one iteration of a course (a video for more than just in the moment feedback), use the regular Kaltura Capture on your device. See the tutorial Introduction to Kaltura Capture for more information.

All videos you create using **Kaltura Express Capture** will be saved in your My Media area no matter where you create them, so you should delete them from the My Media area periodically (e.g., a year after a course has ended) so you don't end up with hundreds of feedback videos in your My Media space.
