

Setting Videos to Allow for Downloads through My Media in D2L – Kaltura Tutorial

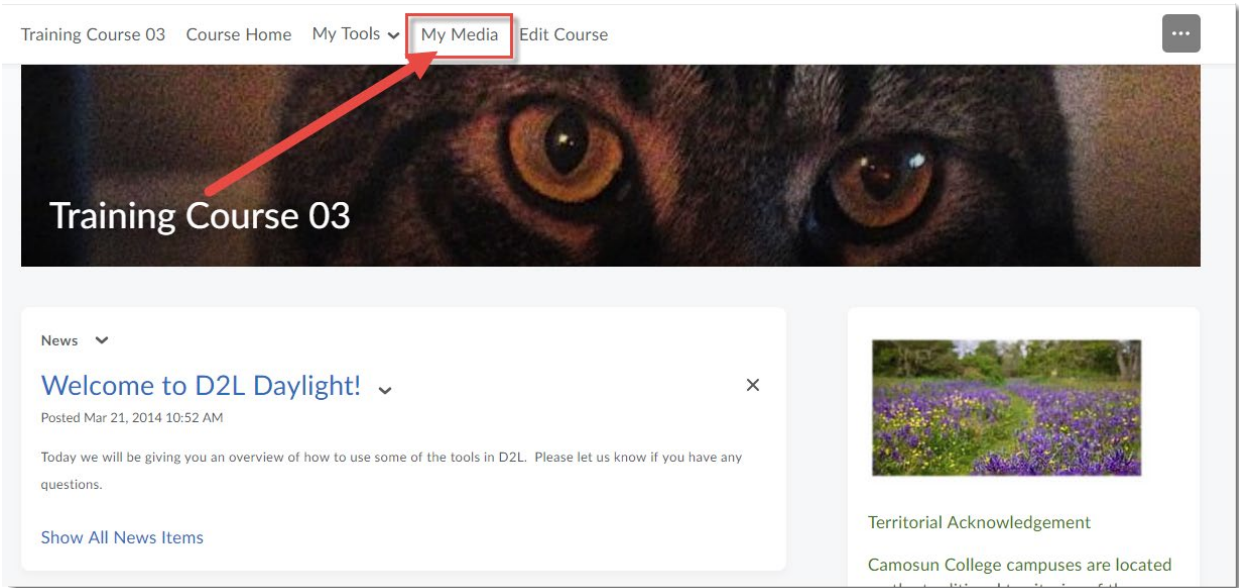

This tutorial is designed for faculty who have previous experience using D2L and who have uploaded media to **My Media** in D2L. For further information or assistance, go to our [Team Dynamix Support portal](#) and click the appropriate Category to submit a ticket.

Scenario

This tutorial will cover the steps involved when you wish to allow students to download a video. There are two parts to this tutorial: setting a video to allow downloading, and adding it to the **Course Media** gallery so students can download it.

Steps

1. Go to your course in D2L.

Things to Remember

Students will NOT be able to download your video if you have only embedded it in an HTML editor page (for example, a Content page). They can only download videos from the **Course Media** gallery.
